FUND MANAGER COMMENTARY

In May 2025, IDR Equity Syariah Fund booked positive performance of +6.65% mom, below the benchmark performance. In May 2025, JCI continued its positive momentum and reversing early-year weakness, up +6.04% MoM. The gain was driven by improved domestic sentiment, especially improved tax revenue and BI rate cut. Globally, weakening DXY also helped to strengthen the Rupiah -3.2% MoM to IDR16,255 level, providing further optimism for equity markets. Foreign participation remained modest with a net-inflow of IDR5.5trn (\$773mn), but this marked the first monthly net-inflow in the last 4 months. In terms of sector inside JAKISL, largest positive contributors were Materials (primarily TPIA IJ and ANTM IJ), Communication Services (TLKM IJ), and Energy. Going forward, equity market volatility may remain high especially with the on-going US tariff negotiations and the macroeconomic impact from it. That said, we continue to believe that the potential of sustainable and structural improvement in Indonesian economy with potentially rising GDP/capita could become a positive tailwind for long-term Indonesian equity market return, as such at current market levels we think it could offer a good market entry opportunity with an attractive risk-reward.
